

REMARKS

Claims 1-10, 13 and 14 remain in this application.  
Claims 11 and 12 have been cancelled.

Entry of the above amendments is earnestly solicited.  
An early and favorable first action on the merits is earnestly requested.

Should there be any matters that need to be resolved in the present application, the Examiner is respectfully requested to contact the undersigned at the telephone number listed below.

The Commissioner is hereby authorized in this, concurrent, and future replies, to charge payment or credit any overpayment to Deposit Account No. 25-0120 for any additional fees required under 37 C.F.R. § 1.16 or under 37 C.F.R. § 1.17.

Respectfully submitted,

YOUNG & THOMPSON

**APPENDIX:**

The Appendix includes the following item:

A new Abstract of the Disclosure

J

ABSTRACT OF THE DISCLOSURE

A knob is rotated from its zero position to set a dose. This rotates an indexer, which through its peg turns a ring by pushing on one of the teeth. A position is reached wherein the free end portion of the peg meets a cam surface. On continued rotation of the knob, the peg is forced radially inwards to clear the tooth that it has just been pushing against. The ring, having been shifted through one-seventh of a complete revolution is then left stationary while the knob is turned further to whatever dose is required. When a syringe actuation trigger is pressed, the knob winds back again to its zero position, taking with it the indexer. The peg is still held clear of the ring until it hits the sloping side of the tooth following the one which it had previously pushed.
